#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3, 8-9, 17, 21-24 and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by Chobotov et al-6,761,733.

As to claims 1-3, 8-9, 17, 21-24 and 26, Chobotov-'733 (Figs. 19-26) discloses a catheter system including a combination of elements 411 (stent), 412, 413, 418, 415, 408 (self-expanding stent) and 416 as a 1<sup>st</sup> stent-graft component, combination of elements 414 and 407 (self-expanding stent) as a 2<sup>nd</sup> graft component (Fig. 19-22), which can be considered as

Art Unit: 3773

separately or independently expanded from 1<sup>st</sup> graft component, sheath 426/capsule assembly to receive 1<sup>st</sup> graft component, belt 458 and 462 as a restraining structure, release wire 442 as a releasing mechanism substantially as recited in the claims.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-7, 10-16, 18-20, and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chobotov et al-6,761,733.

As to claims 4-5 and 10, it would have been obvious to one of ordinary skill in the art to provide the Chobotov-'733 device the configurations as recited in the claims, as these configurations are only design choices well-known in the art.

As to claims 6-7, 11-16, 18-19, it would have been obvious to one of ordinary skill in the art to provide the Chobotov-'733 device the configurations as recited in the claims, as these configurations are only design choices well-known in the art.

As to claim 20, it would have been obvious to one of ordinary skill in the art to provide the Chobotov-'733 device a 3<sup>rd</sup> graft-component as recited in the claims, as this configuration is well-known in the art.

As to claim 25, it would have been obvious to one of ordinary skill in the art to provide the Chobotov-'733 device an inner catheter with an inflatable (balloon) as recited in the claim, as this configuration of a balloon catheter to expand a stent is well-known in the art.
